Leasing Program Overview

MMRI, Inc has made substantial capital investment in its AccuDry® product line and is now offering AccuDry Lease™, a new way for mill operators to diffuse the costs of equipping kilns with moisture measurement systems. With AccuDry Lease™ you can affordably upgrade your kilns with an AccuDry® system to get the ultimate moisture content visibility for your wood drying kiln, while avoiding maintenance costs.

What is it?

AccuDry Lease™ enables sawmill operators to equip their kilns with AccuDry®, the lumber industry's leading moisture measurement system which provides visibility of moisture content with 99% accuracy, with zero lump sum purchase expenses. Properly equipping a kiln can be an untimely financial burden, but with AccuDry Lease™ low monthly lease installments. Eliminate lump sum purchasing! An AccuDry system accommodates eight measurement points, with up to four meters included per system.

Available Terms

- 10 yrs
- 5 yrs (60 mo)

Why Lease?

Cash-flow: AccuDry Lease™ eases the financial strain on mill operations by offering low monthly lease payment options to best suit your needs. Whether installing initial systems or retrofitting old systems, leasing diffuses the costs and helps keep mill operations cash flow positive.

Warranty: AccuDry Lease™ includes a 100% warranty on all system parts and shipping. The kiln is a very harsh environment and even the best equipment wears out eventually, which can substantially add to system investment costs. With AccuDry Lease™ you never own the system, won't have to worry about maintaining it (or buying spare meters for that matter), and you don't have to track asset depreciation. Periodic calibrations are performed to ensure system accuracy.
